

Our Commitment to Product Transparency

Finelite is the first lighting manufacturer to third-party verify the majority of its portfolio of luminaires and enroll them in the International Living Future Institute's Declare 2.0 Program. As we continue to take greater strides for transparency and optimization, we help project teams achieve their material ingredient transparency and optimization goals. Through this initiative we provide you the tools needed to make fully informed choices when specifying healthy products for the future of healthier buildings. Our Declare offerings help support project teams in achieving green building standards, such as LEED, WELL, and LBC.

Declare.

Over 90% of our portfolio has received third-party verified Red List Approved and Declared labels.

ABOUT DECLARE

A new industry standard that keeps track of the material ingredients in the form of a "nutrition label". This label lists all the components used in construction goods and is free of harmful chemicals found on the LBC Red List.

Final Assembly Locations are collectively represented on a single label.

Embodied Carbon (optional) discloses the cradle-to-gate impacts of manufacturing the product as reported by manufacturer-specific Type III Environmental Product Declarations.

End-of-life options: take back programs; salvageable or reusable in its entirety; biodegradable/compostable (%); recyclable (%); landfill (%); hazardous waste.

Ingredients are reported by component. Ingredients without restriction appear in grey; **Red List chemicals** appear in dark orange; **Watch List Priority for inclusion chemicals** appear in light orange.

LBC Temporary Exemptions recognize specific market limitations and provide a compliance pathway for products to obtain LBC Compliance recognition.

Declare Identifier for company and product, valid for 12 months.

Original Issue Date indicates how long a product has been in the program.

FINELITE TAILORED LIGHTING
Steel Luminaires - RLA
Finelite, Inc.

Final Assembly: Livermore, California, USA; Union City, California, USA
Life Expectancy: 10 Years
End of Life Options: Recyclable (100%)
EU CoC Screened: Contains

Ingredients:

Steel: Small Electrical Component¹; Polymethyl methacrylate; 2-Propenoic acid, 2-methyl-, methyl ester, polymer with ethyl 2-propenoate; Poly(imino(6-dioxo-1,6-hexanediyloxyimino-1,6-hexanediyloxy)aluminum; 2-Propenoic acid, 2-methyl-, methyl ester, polymer with butyl 2-propenoate and ethylbenzene; 2-Propenoic acid, 2-methyl-, methyl ester, polymer with diethybenzene and ethylbenzene; Copper; Melamine cyanurate; Titanium dioxide; 1,5-Benzenedicarboxylic acid, polymer with 1,4-benzenedicarboxylic acid; 2,2-dimethyl-1,3-propanediol; 1,2-ethanediol and hexanedioic acid; 1-Propene, polymer with ethene; Bicyclo[2.2.1]hept-2-ene; 5-ethylidene-, polymer with ethene and 1-propene; Ammonium polyphosphate; Phenol; 4,4'-(1-methylethylenediylbis-) polymer with 2,2'-(1-methylethylenediyl)bis(4-(3-phenylenoxyphenyl)phenyl)bis(oxazane); 2-Propenoic acid, 2-methyl-, C12-15-branched and linear alkyl esters, polymers with cetyl methacrylate, Me methacrylate, polyethylene glycol methacrylate branched tricycl ether and stearyl methacrylate; Methyl methacrylate; 1-Propene; homopolymer; isotactic; Barium sulfate; 1,3,5-Triazine, 2,4,6-trichloro-, polymer with piperazine, reaction products with morpholine; Aluminum hydroxide; Polyethylene foam; 1,4-bis(triglycidyl ether)benzene¹; Ethyl acrylate; Paraffin; Poly[6-(6-morpholino)-1,3,5-triazine-2,4-diyloxy-1,4-piperazinediyl] (average MW 1690 g/mol); Polyethylene; Zirconium, dihydrate chloro hydroxy propylene glycol aluminum complexes

FINELITE'S DECLARE OFFERINGS BY FINELITE INC. ARE VERIFIED BY THE INTERNATIONAL LIVING FUTURE INSTITUTE™ www.livingfuture.org/declare

LBC Criteria Compliance demonstrates compliance with all Imperatives applicable to the selection of building products within the Living Building Challenge. If a product meets the requirements for all applicable imperatives, the product is considered fully compliant with the Living Building Challenge, and will be noted as such on the Declare label graphic itself.

I-13 Red List requires that manufacturers disclose the ingredients and VOC content (if applicable) in their products to ensure that they are free of Red List chemicals.

I-10 Interior Performance requires compliance with the California Department of Public Health (CDPH) Standard Method v1.1-2010 (or international equivalent) for all interior building products that have the potential to emit Volatile Organic Compounds (VOCs). The Declare label confirms a product's compliance with CDPH or an equivalent emissions standard

I-14 Responsible Sourcing requires that manufacturers of wood products demonstrate sustainable extraction through certification with the Forest Stewardship Council, by meeting ILFI's definition of low risk or salvaged wood, or through the use of a formal LBC Exception.

Third Party Verification indicates assessment by a professional third-party assessor to ensure the accuracy of the manufacturer's supply chain, purchasing, ingredient claims, LBC compliance, and embodied carbon if reported.

A HOLISTIC APPROACH TO GREEN BUILDING STANDARDS THROUGH DECLARE

When you incorporate Finelite Declare solutions into your building plans, you're using third-party verified products that are designed with occupant health, well-being, environment, and energy savings in mind. The guide below provides a brief visual reference of the programs and credits our Declare products contribute to.

LIVING BUILDING CHALLENGE (LBC) 4.0 AND CORE GREEN BUILDING CERTIFICATION

Finelite's products that are Red List Approved (**RLA**) comply to the Materials Petal Imperative within the LBC 4.0 standard. This imperative calls for products that are free of Red List chemicals to promote an ecologically restorative and transparent environment.

Standard	Petal	Imperative	Optional or Required	Finelite Offering
LBC v4.0	Material	I-12 Responsible Materials	Required	-RLA
LBC v4.0	Material	I-13 Red List	Required	-RLA
LBC v4.0	Material	I-14 Responsible Sourcing	Required	-RLA
LBC v4.0	Material	I-15 Living Economy Sourcing	Required	-RLA
LBC v4.0	Material	I-16 Net Positive Waste	Required	-RLA

LEED V4 - V4.1 *:

Finelite's Red List Declare (**RLD**) and Red List Approved labeled products can help contribute to achieving LEED v4 and v4.1 credits. These credits call for the chemical inventory of the product at least 0.1% (1000 parts per million), respectively. Finelite's Red List Approved products help contribute to a project team achieving Material Ingredient Reporting Option 1 within the LEED v4.1 rating system.

Rating System	Credit Category	Credit	Prerequisite or Credit	Finelite Offering
LEED v4.1	Building Product Disclosure and Optimization	Material Ingredient Reporting	Credit, Option 1	-RLD, -RLA
LEED v4.1	Building Product Disclosure and Optimization	Material Ingredient Reporting Third-Party Verified	0.5 Credit, Option 1	-RLD, -RLA

* Third-party verified Declare labeled products count as 1.5 Products instead of 1 Product in the LEED v4.1 Credit calculation in Option 1.

WELL BUILDING STANDARD V2 *:

Finelite's Declare and Red List Approved labeled products can help contribute to achieving various features within the International WELL Building Standard. These features take a precautionary approach to hazards by emphasizing healthy material selection to minimize risks and prioritize supply chain and ingredient transparency.

Version	Concept	Feature	Precondition or Optimization	Finelite Offering
WELL V2	Material	X13 - Enhanced Material Precaution	Optimization	-RLA
WELL V2	Material	X14 - Material Transparency	Optimization	-RLD, -RLA

* Our Declare labeled products also support project teams achieving WELL material features as they contribute to the USGBC LEED v4/v4.1 Material Ingredient Reporting Option 1 Credit.

SIMPLIFYING THE SPECIFICATION PROCESS

Finelite makes the specification process easy when putting healthier products on your projects. Simply add – **RLA** (Red List Approved) or – **RLD** (Declared) to your part number.
