

Professional Development

THE AMERICAN INSTITUTE OF ARCHITECTS CONTINUING EDUCATION SYSTEMS

Integrated Classroom Lighting Design III

- AIA HSW and SD Approved - 1 LU Hour
- NCQLP Approved - 1 LEU Hour

Provider:

Finelite, Inc.

Method of Delivery:

The CES facilitator will use a powerpoint presentation to review the information.

Audio/Visual Required:

CES Facilitator will provide audiovisual equipment. Access to electrical outlet will be required.

Cost to Participants:

FREE

Point of Contact:

Marc McMillan
Director of Marketing
Finelite, Inc.
30500 Whipple Road
Union City, CA 94587
P: 510-476-2914
F: 510-441-1510
E: mmcmillan@finelite.com

Program Summary

PROGRAM OVERVIEW:

This one hour HSW LU program will review research projects conducted for the New York State Energy Research and Development Authority (NYSERDA) as well as the California Energy Commission (CEC). The research demonstrates the importance of high performance lighting systems on today's learning environments. We will review the Integrated Classroom Lighting System template and demonstrate how this template is affordable, easy to implement, improves the learning environment, meets LEED and CHPS requirements, and drastically reduces school utility expenses.

LEARNING OBJECTIVES:

Using information gathered during research projects conducted for NYSERDA and the CEC the participant will be able to:

- Review and become familiar with research conducted by the NY State Energy Research and Development Authority (NYSERDA) on the latest in high performance classroom design
- Understand how today's classrooms have changed and how to apply the necessary lighting design changes to meet the needs of the classroom and reduce energy consumption.
- Understand how the research findings relate to best practices put out by LEED for Schools and the Collaborative for High Performance Schools and which categories the architects will be able to achieve points.

FACILITATOR QUALIFICATIONS:

All Finelite CES facilitators have been trained on CES guidelines and presentation skills. In addition, all presenters receive continuous training on the science of lighting, best practices, and all applicable energy codes related to the lighting design process.
