

INSTRUCTIONS

1. Identify ceiling type and install mounting brackets and junction boxes as shown (1a, 1b, or 1c). All power in junction box should be turned off during installation.
2. Attach cable bracket to top of fixture making sure to face the extended bracket edge towards the back closed side of the fixture...as shown.
3. A) Adjust bracket to desired location. Secure locking fastener and #8 kee nut with 11/32" nut driver. B) Adjust height by inserting the cable into the gripper. Depress the tip of the gripper to release and lower the fixture. Insert wire feed through canopy and complete appropriate electrical connections in J-Box.
4. (4a)Install GridBox™ on to the building structure. (4b)Crimp and secure excess aircraft cable to structure. Turn on power to fixture to test proper function.
5. Make sure lamp is rotated properly to distribute light on wall.

NOTE: All power connections to be installed to local/national codes by a certified electrician.
