

FINELITE

Series X1 Joining Instructions - (Semi-Adjustable Cable Shown)

DO NOT attempt to join fixtures together on the floor. Damage may result when lifted. Follow these instructions.

1. Hang STARTER fixture as instructed on other side of this sheet.

2. Hang far end of JOINER fixture while supporting both ends. Connect plug together wiring between STARTER and JOINER. Tuck plug together wiring into channel (careful not to pinch any wires). Slide fixtures together.

3. Two 10/32 x 3 1/2 carriage bolts are provided to secure luminaires together. Insert bolts where shown and secure with nuts (provided).

FINAL CHECK

4. - Luminaire joints are tight.
- Aircraft cable assembly sits securely on curve balancer, nut is tight.
 - Plug together wiring is connected and no wires have been pinched between luminaires.
 - Safety stop (fully adjustable units) is secured and in place.
 - Two 10/32 x 3 1/2 carriage bolts have been installed and secured in place between fixtures.
