**Regressed Luminaires** Use Same Instructions

## Overview

**FINELITE**® Better Lighting

## **NOTES**

- If luminaire contains a sensor or socket refer to the appropriate Addendum.
- · All power connections should be installed according to local/national codes by a Certified Electrician.
- This installation requires proper support as each luminaire is being installed.
- DO NOT attempt to join luminaires together on the floor. Damage may result when lifted.

## **Step 1** - Mounting & Suspension

### **Mounting Options**

### Option 1

T-Bar Mounting - GridBox™ and Caddy Clips

- Install GridBox<sup>™</sup> and electrical conduit at feed locations.
- Install caddy clips at mounting point locations.
- All caddy clips are to be secured to structure, per local building codes.

## Option 2

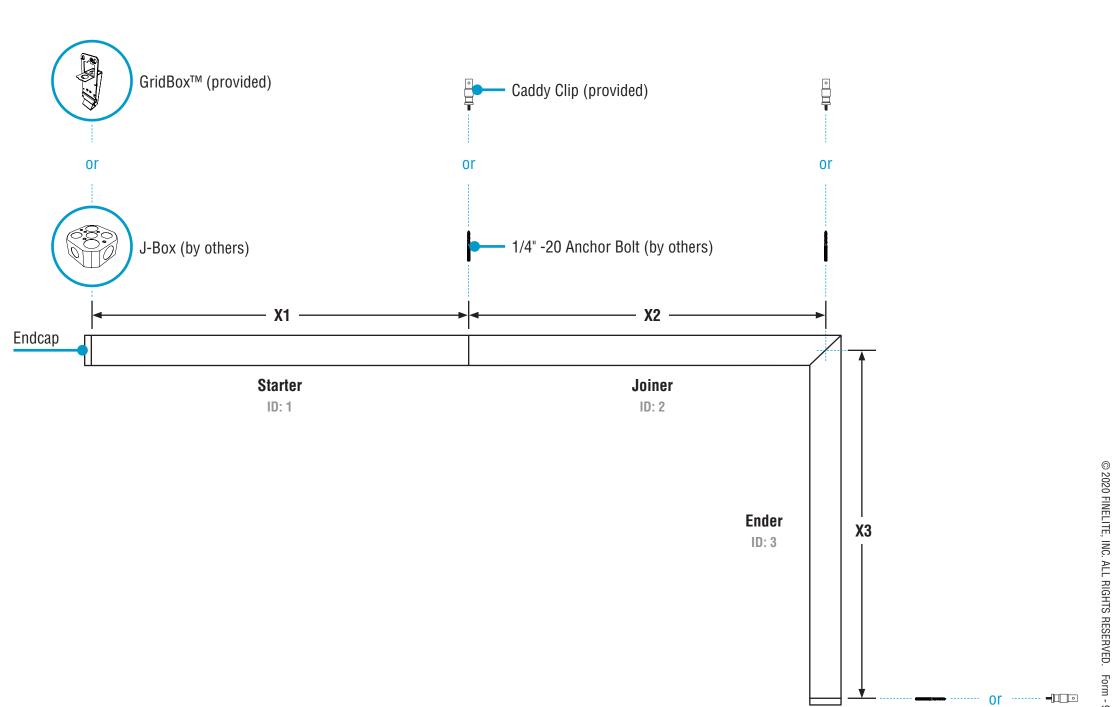

### Drywall (C4) or other hard surfaces\* - J-Box and Anchor Bolts

- Install J-Box and electrical conduit at feed locations.
- Install anchor bolts at mounting point locations.
- All anchor bolts are to be secured to structure, per local building codes.
- \* Other hard surfaces include: wood, sheet metal panels, steel beams, concrete or masonry. Use hardware appropriate for each surface material type.

### Suspension Locations

**X** = Suspension Dimensions

Refer to Record Drawings and building plans to determine exact mounting, suspension points, and power feed locations.

**Mounting Option 2** 

1/4"-20 Anchor Bolt

## **Step 2** - Identification & Preparation

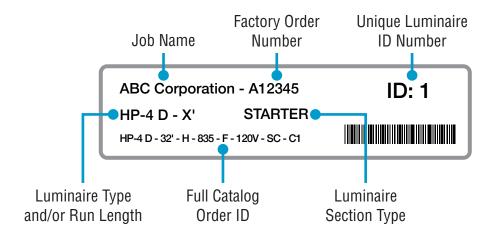

# FINELITE® Better Lighting

Protective Bag

Protective Bag

### A. Identify Luminaires

- Identify all luminaires by their ID label that can be found on the box, the diffuser, and inside the luminaire.
- **NOTE:** Exact location of labels in these areas may vary.
- · Remove all luminaires from their box.

**Kitted Hardware** 

Finelite has provided

with the luminaire.

B. Remove Diffusers or Louvers

**ID** Labels

NOTE: For White Cross Blade Baffle, refer to

Baffle Tether Addendum before installing.

• Carefully remove all diffusers or louvers, keeping them inside their protective bags.

• Ensure diffusers or louvers can be clearly identified back to their corresponding luminaire.

• Set aside all diffusers or louvers to prevent from getting dirty or damaged.

## **Step 3** - Mounting Starter to Structure

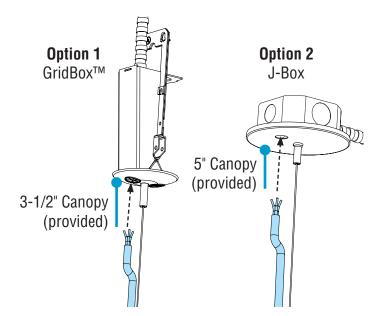

## A. Mount Starter to Structure

- Slide canopy appropriate for electrical type options onto mounting bolt (anchor bolt or caddy clip bolt).
- (Option 2 only) Thread the slip ring onto anchor bolts and secure with set screw at both mounting locations.
- Thread the bushing/cable assembly onto mounting bolts.
- While properly supporting luminaire, maneuver luminaire to ceiling.
- Locate grippers at luminaire ends and feed end of aircraft cable through it by depressing top of gripper.

## **B. Make Electrical Connections**

WIRING LEGEND			
Black	Hot	Line Voltage	
White	Neutral	Line Voltage	
Green	Ground		
Grey	Dimming	0-10V DC	
Purple	Dimming	0-10V DC	
•			

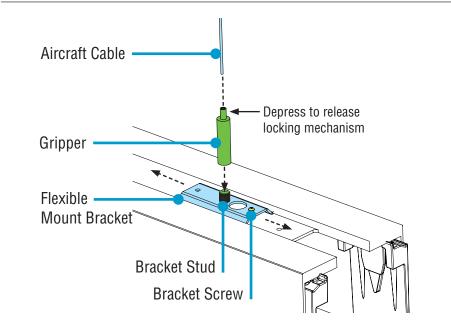

- (Option 1) Feed power cord through the 3-1/2" canopy and connect wires inside the GridBox™.
- (**Option 2**) Feed power cord through the 5" canopy and connect wires inside the J-Box.
- CRITICAL: If installing mitered corner, PROCEED TO STEP 7.

**OPTIONAL Flexible Mount** pendant brackets are adjustable for custom mounting locations.

- **NOTE**: Minimum 6" from end of housing to bracket stud on pendant bracket.
- Maximum distance depends on length of luminaire (see table).

Luminaire Length	Max.	Min.
8'-12'	1'10"	8"
< 8'	10"	6"

- Loosen (but do not remove) the bracket screw.
- Slide flexible mount pendant bracket to desired location and tighten screw to secure.
- Attach gripper onto bracket stud.
- Feed bushing/cable assembly through gripper by depressing top of gripper.
- Allow excess cable to rest atop luminaire. Crimp then trim, if necessary.

**Mounting Option 1 (shown)**

## **Step 4** - Joining Luminaires

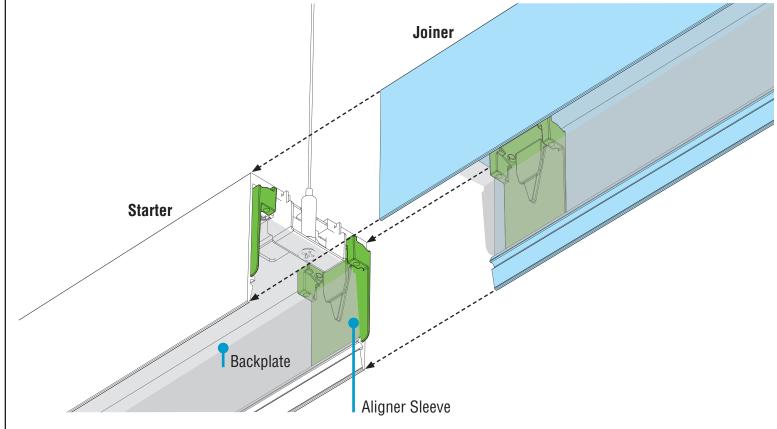

### A. Mount Joiner to Structure

B. Join Luminaires

Once luminaires are aligned together, joiner luminaire is not yet secure.
Ensure it does not slide off as it rests on the starter luminaire.

- For the joiner luminaire, slide canopy appropriate for electrical type onto mounting bolt (anchor bolt or caddy clip bolt)
- . Thread the bushing/cable assembly onto mounting bolt.
- While properly supporting luminaire, maneuver luminaire to ceiling.
- Locate gripper at luminaire ends and feed aircraft cable through it by depressing top of gripper.

- Align joiner with aligner sleeves on starter and slide together. Be careful not to damage any wiring.
- · If necessary, lift both luminaires, then slide together.

Mounting Option 1 (shown)

3-1/2" Canopy (provided)

2" T-Bar Support Canopy (provided)

5" Canopy (provided)

2" Drywall Support Canopy (provided)

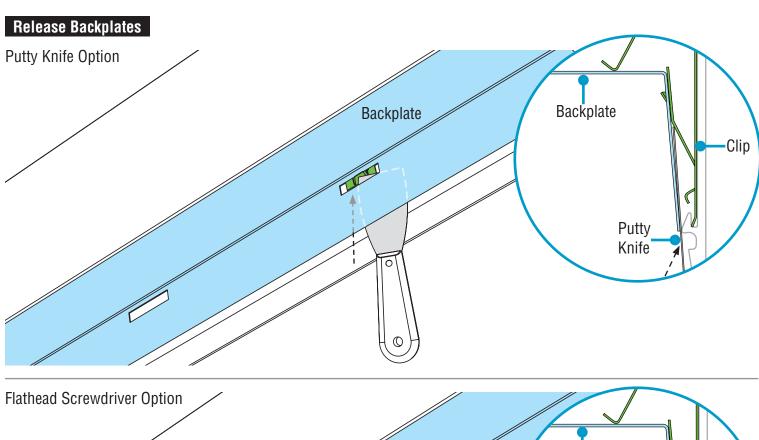

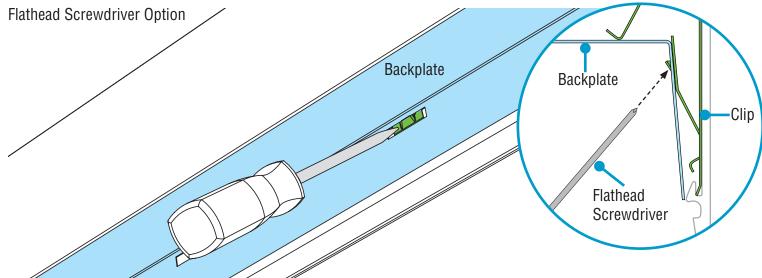

Slip Ring w/ Set Screw (provided)

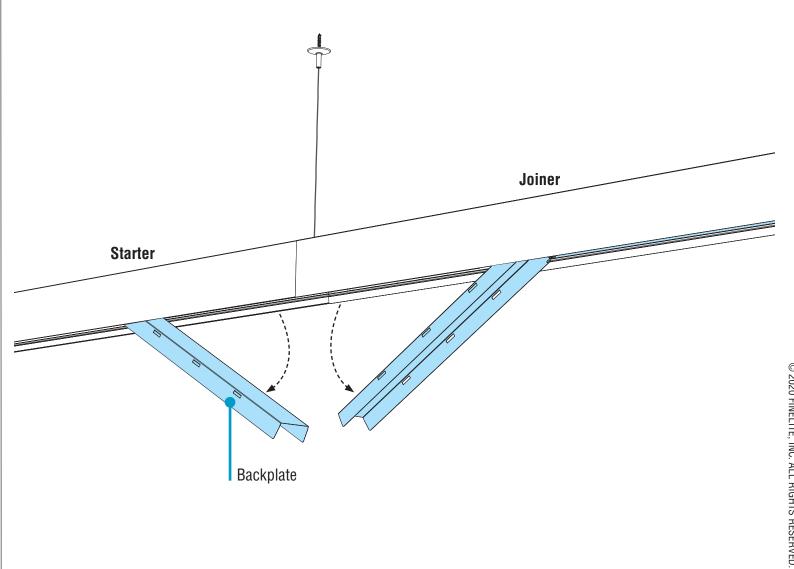

## **HP-4 Direct with Mitered Corners** Installation Instructions **Step 5** - Opening Luminaires

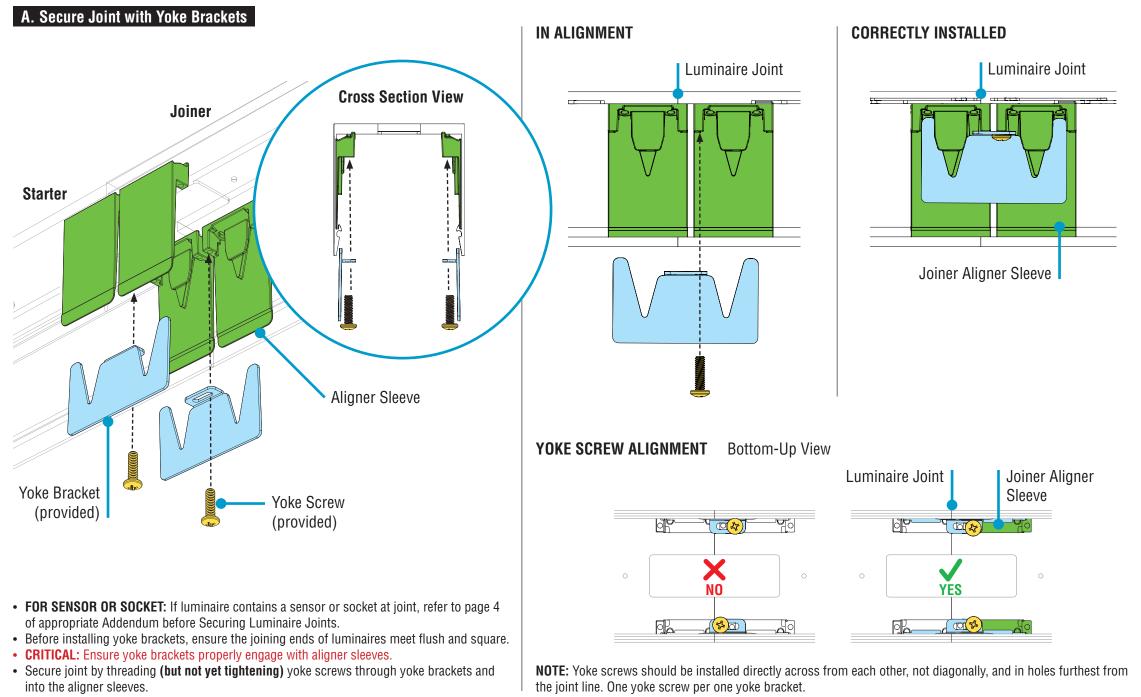

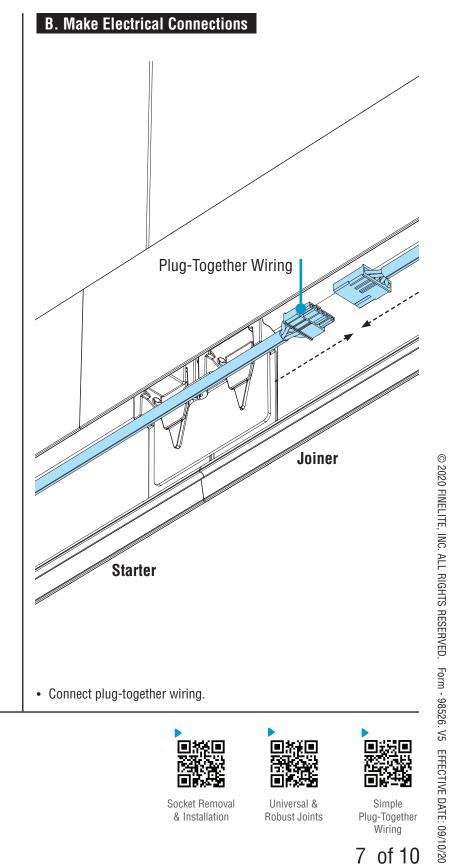

• Carefully rotate backplates out at the joints only and let them hang from luminaire body.

## **Step 6** - Securing Luminaire Joints

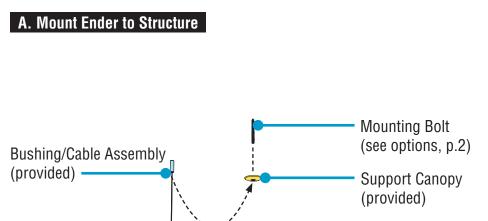

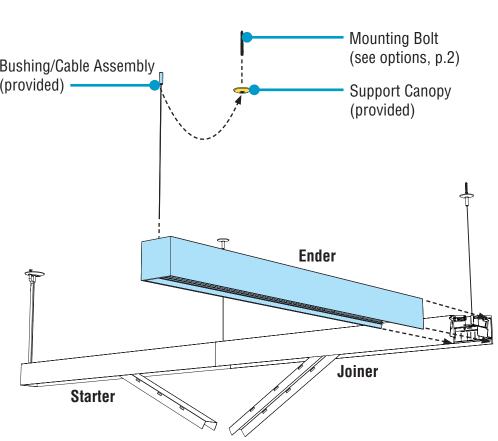

Universal & Robust Joints

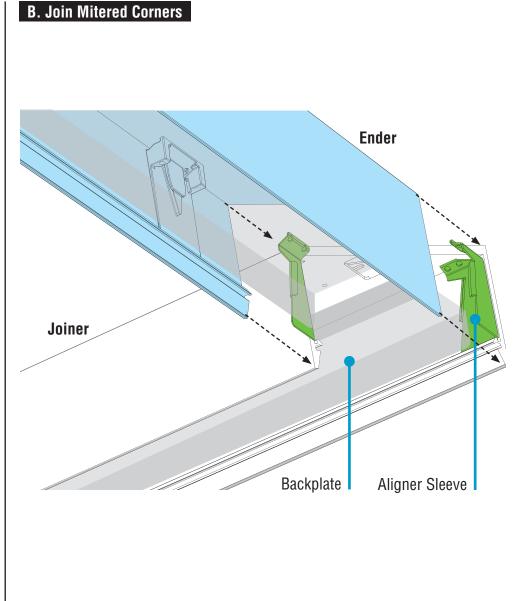

## **Step 7** - Joining Mitered Corners

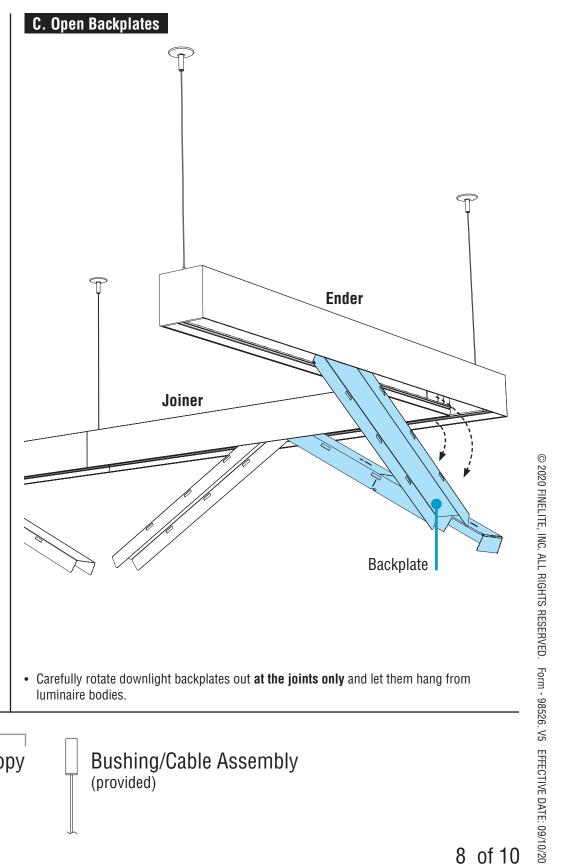

- For the ender luminaire, slide canopy onto mounting bolt (anchor bolt or caddy clip bolt).
- · Thread the bushing/cable assembly onto mounting bolt.
- · While properly supporting luminaire, maneuver luminaire to ceiling.
- Locate gripper at luminaire ends and feed aircraft cable through it by depressing top of gripper.

· If necessary, lift both luminaires, then slide together.

• Carefully rotate downlight backplates out at the joints only and let them hang from luminaire bodies.

Mounting Option 1 (shown)

3-1/2" Canopy (provided)

2" T-Bar Support Canopy (provided)

5" Canopy (provided)

2" Drywall Support Canopy (provided)

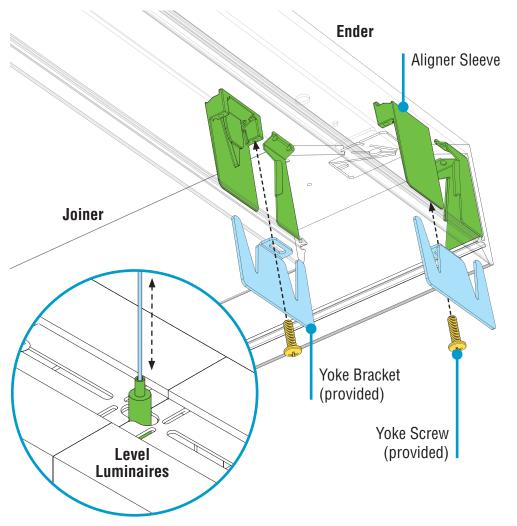

Slip Ring w/ Set Screw (provided)

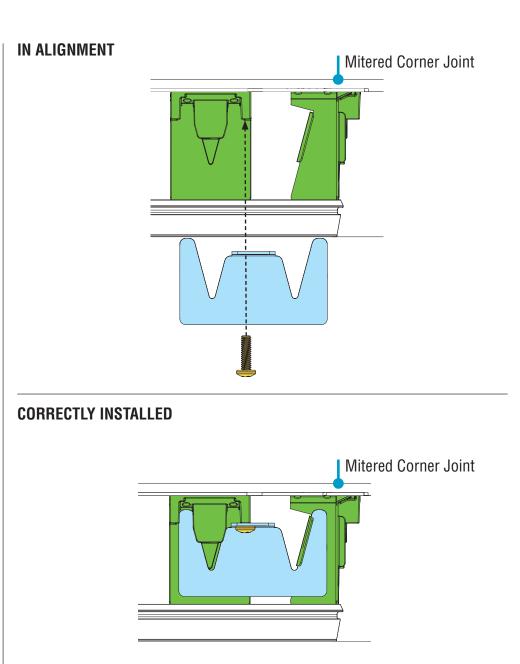

## **Step 8** - Securing Corner Joints

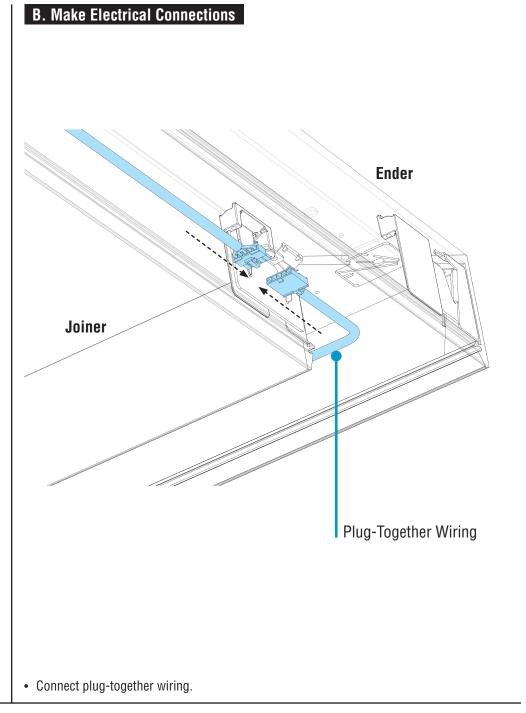

## A. Secure Joint with Yoke Brackets

- Before installing yoke brackets, ensure the joining ends of luminaires meet flush and square.
- CRITICAL: Ensure yoke brackets properly engage with aligner sleeves.
- Secure joint by threading **(but not yet tightening)** yoke screws through yoke brackets and into the aligner sleeves.
- Level all luminaires to desired height by depressing top of grippers to adjust cable lengths.
- Tighten yoke screws¹ until joint seam of luminaires is closed.

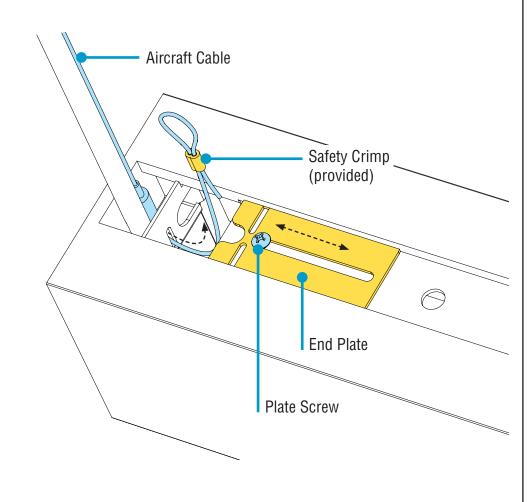

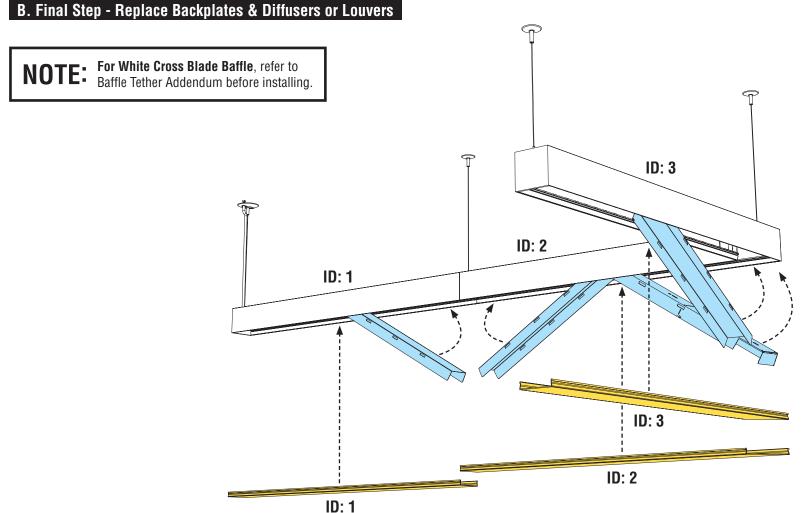

# **HP-4 Direct with Mitered Corners** Installation Instructions **Step 9** - Closing Luminaires

# FINELITE® Better Lighting

### A. Crimp Cables

- Ensure all leveling has been performed prior to applying safety crimp.
- Loosen (but do not remove) plate screw and slide end plate open.
- · Loop aircraft cable through safety crimp.
- Crimp, cut excess cable, and tuck back into luminaire body.
- Close end plate and tighten plate screw to secure. Typical for each aircraft cable.

- NOTE: If your installation includes a battery backup, please see addendum (98333) that should be included with your kitting package.
- FOR SENSOR OR SOCKET: If luminaire contains a sensor or socket at joint, refer to page 5 of appropriate Addendum before Closing Luminaires.
- Reinstall any open backplates by rotating into luminaire body and snapping back into clips.
- · Remove diffusers or louvers from protective plastic bags.
- CAUTION: Wear gloves to keep diffuser or louver surface clean.
- CRITICAL: Be sure to install correct diffuser or louver to its corresponding luminaire ID.
- NOTE: For White Cross Blade Baffle, refer to Baffle Tether Addendum before installing.
- Install diffuser or louver into luminaire body, ensuring it snaps into place.
- Turn power on to luminaires.
