Course# VLD100

Disinfecting Environments with Safe, Visible Light

- AIA HSW Approved - 1 LU, HSW
- NCQLP - 1 LEU (Self-reporting)

Provider:

Finelite, Inc.

Method of Delivery:

The facilitator will use a powerpoint presentation to review the information.

Audiovisual Required:

Facilitator will provide audiovisual equipment. Access to an electrical outlet will be required.

Cost to Participants:

Free

Point of Contact:

Renato Quiocho Jr.

Web Designer - Internal/External Communication
Finelite, Inc.

30500 Whipple Road

Union City, CA 94587

F: 510-441-1100

Program Summary

PROGRAM OVERVIEW:

A desperate need for options to disinfect environments has driven businesses to consider alternatives to current practices, with many businesses looking towards lighting as a solution to improve the safety for all occupants.

Disinfection lighting technology has been used in healthcare applications for decades, but now is the time to think beyond that. In this course we will explore different types of disinfection lighting technology, ideal applications, and different strategies to create clean and occupant safe environments.

LEARNING OBJECTIVES:

Attendees will:

- Understand the difference between clean and disinfection
- Explore different types of light disinfection and how to disinfect with light
- Examine best application and strategies to create safe, clean environments

FACILITATOR QUALIFICATIONS:

All Finelite facilitators have been trained on guidelines and presentation skills. In addition, all presenters receive continuous training on the science of lighting, best practices, and all applicable energy codes related to the lighting design process.
